HOBBS TIP:
One word
is diagonal!

ANSWER KEY: propeller, roll, rocket, bush plane, pilot, eject, lake, radio, tail, wing, jet, wind

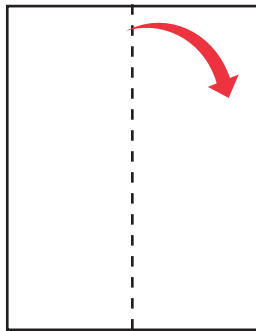

HOBBS FUN FACT: We have a canoe here in the museum, can you find it?

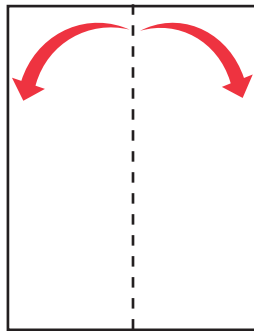

THE 'SABRE' PAPER AIRPLANE

START WITH A REGULAR PIECE OF RECTANGLE PAPER (8.5 X 11")

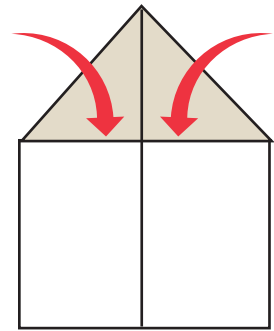

Fold paper in half lengthwise

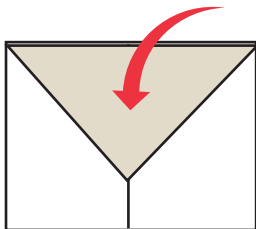

Unfold

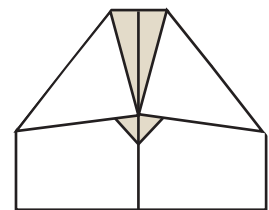

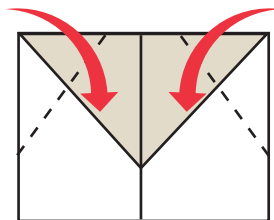

Fold both top corners down to the center, creating a pointy peak

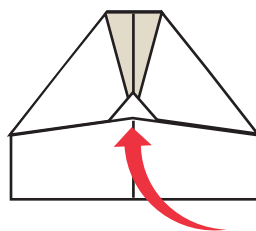

Fold the top part down

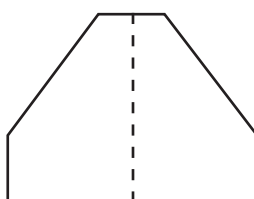

Fold both top corners down to the center without making a pointy peak. A little bit of the top must be flat

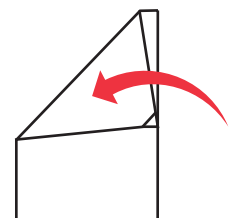

Fold the small centre part up

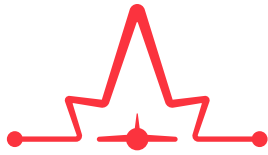

Turn the paper over

Fold the right half over

Continued on second page

THE 'SABRE' PAPER AIRPLANE

CONTINUED

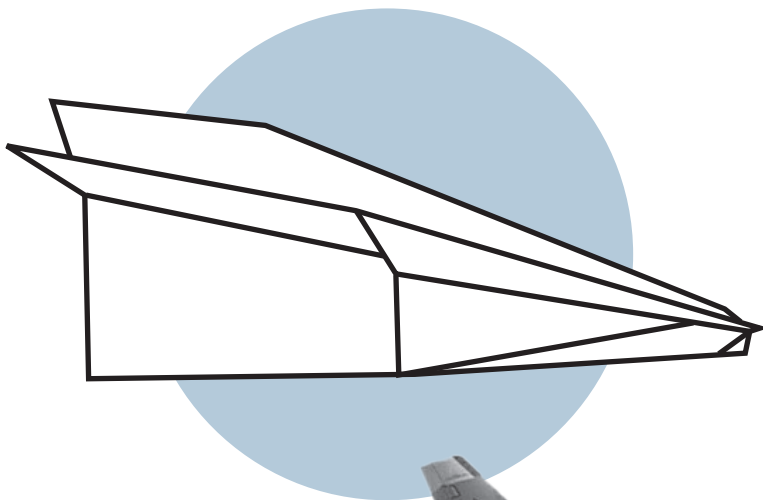

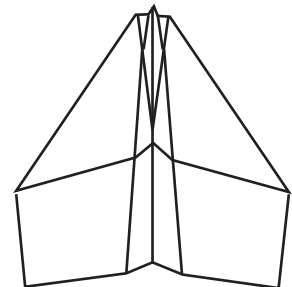

Fold a part of the wing over to the right as below

Turn the paper over. Now fold this wing to match the other wing

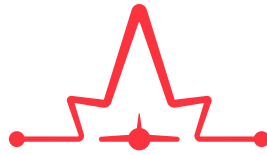

Unfold both wings and that's the final step

Test its flight and see how it flies against a standard paper plane.

The Sabre was a jet fighter built by Canadair under licence. It was produced until 1958 and flown by the Royal Canadian Air Force (RCAF). The Canadair Sabre reached supersonic speeds in dives - first achieved in Canada by test pilot Al Lilly, in 1950 when he broke the sound barrier. Flown by the RCAF's Golden Hawks aerobatic team from 1959 to 1964.

DID YOU KNOW?

The CF-104 Starfighter was nicknamed “the missile with a man in it,” since its long, thin fuselage and stubby wings resembled a missile more than a conventional aircraft.

See Canadair CF-104 Starfighter 12703 in person only at the Royal Aviation Museum of Western Canada.
